Invited Speakers and Chairs

All Speakers and Chairs are invited by the Presidents and the Local Organising Committee.
Welcome to the eighth International Congress on Spondyloarthropathies. The field of SpA research has seen huge advances on many fronts since the inaugural Congress: the themes in the 1998 program would be notable for the absence of biologic therapy, quantitative MRI, and the biology of ERAP1.

Over the ensuing years, the Congress has become the premier international research meeting focussing on SpA. The Eighth International Congress on Spondyloarthropathies will continue this strong tradition by convening a broad range of researchers spanning molecular biology and cellular immunology, genetics, epidemiology, and clinical research including imaging and clinical outcomes. The success of the meeting has been attributed to the high calibre of the research, a format which involves multidisciplinary expertise, and a venue which encourages both social and scientific interactions.

The program for the meeting showcases advances in genetics, immunology, bone biology, and inflammation in the gut and skin, as well as bone and joint. These major themes will be presented in a series of state-of-the-art lectures by international experts in the respective fields. Recognizing the high calibre of the abstracts submitted to this meeting in the past, the program this year will include more time dedicated to podium presentations of abstracts of exceptional quality. It is the goal of the meeting not only to contribute to disseminating these recent advances, but also to contribute to advancing the field of SpA research through communication and collaboration. This Congress has proved to be an ideal forum to build those synergies.

As Co-Presidents of the 2012 Congress, we extend a warm welcome to this exciting meeting and to the warmth and charm of the host city of Gent.

Paul Bowness and Robert Inman,
Presidents,
8th International Congress on Spondyloarthropathies
