Nefertiti Greene

Independent Director (to be elected in 2024)

Year of birth: 1971

Nationality: American

Gender: Female

End of term: 2028

Introduction & Professional experience

Nefertiti Greene is a senior healthcare industry executive with 30 years of health industry experience. Her leadership skills and commercial experience span pharmaceutical, medical technology and animal health sectors.

Today, Nefertiti is the President of the Science & Diagnostics division of Mars Petcare, the leading health, services and nutrition company for pets. She oversees the growing diagnostics business and leads Science with Research and Development accountability across Mars Petcare, including the Waltham Petcare Science Institute in the UK. Nefertiti holds full global P&L responsibility for predictive diagnostics, lab diagnostics and pathology, sound imaging, molecular diagnostics and radiologist-led telemedicine. Approximately 4,000 global associates in the science & diagnostics businesses follow her leadership, including veterinary professionals and scientists within pet science, microbiome & biomarker research.

Before joining Mars in 2022, Nefertiti was at Johnson & Johnson for eight years, most recently as Head of Enterprise Strategy and Chief of Staff to CEO. Prior to that Nefertiti's roles included President, Janssen US Infectious Disease and Vaccine (IDV) and President, US Ethicon (General Surgery).

Education

Nefertiti holds a Master of Public Health in Biostatistics from New York Medical College and a BSc in Biology/Chemistry from the State University of New York at Albany.
